Red River

by farmers, for farmers

Built with pride, tested by time. I've had a lifelong passion for livestock handling. I will only build what I'd be happy to use on my own farm!

Andrew Lynch - Owner

Family owned, Red River, **DESIGNS, BUILDS, DELIVERS, AND SETS UP**
Top quality, affordable stockyard solutions with safety, ease and satisfaction in mind.

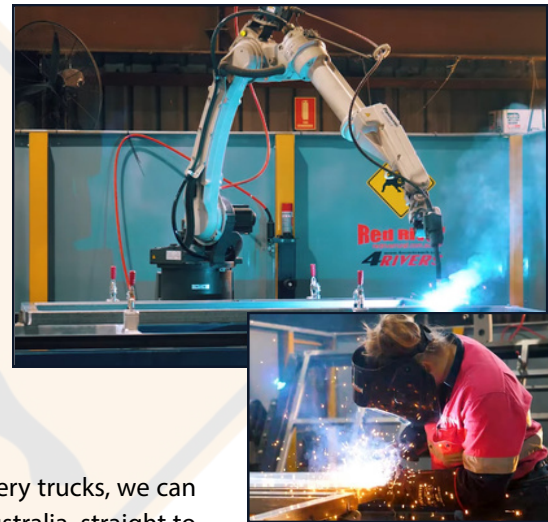

DESIGN

Red River provides standard designs that cater to herds of all sizes, from the hobby farmers to large commercial sheep operations. You can select from our standard packages, or we are delighted to create a customised design tailored to your needs.

BUILD

Red River employs robotic technology alongside manual welding and fabrication across its various manufacturing facilities. Every component is designed and manufactured with the safety of both operators and animals as a top priority.

DELIVER

With our dedicated fleet of delivery trucks, we can provide sheep systems across Australia, straight to your door.

SET UP

Red River has distinctly set itself apart by providing our customers with a delivery and setup service, ensuring peace of mind that your system is fully prepared and ready for use.

SHEEP PANELS

Red River's sheep panel range includes a selection of semi-permanent panels, designed for flexibility and durability. All panels are manufactured with welded caps on both the top and bottom and are supplied with secure connecting pins for added strength and stability.

2 METRE PANELS

2000 mm x 1100 mm high
Fully galvanised 50 mm x 50 mm posts
6 oval rail anti-bruise rails
Heavy top rail 80 mm x 40 mm
Lower rails 60 mm x 30 mm
Welded caps and feet

Key Features

3000 mm x 1100 mm high
Fully galvanised 50 mm x 50 mm posts
6 oval rail anti-bruise rails
Heavy top rail 80 mm x 40 mm
Lower rails 60 mm x 30 mm
Welded caps and feet

Quality guaranteed

3 METRE PANELS

WHY RED RIVER PANELS?

Engineered for strength, durability, and ease of use, Red River panels are fully galvanised and feature welded caps and feet for maximum stability. A heavy top rail ensures added strength and rigidity, reducing flex under pressure and increasing longevity in high-use areas. Designed with livestock safety in mind, our panels offer smooth finishes and optional full sheeting to support low-stress handling.

SHEEP PANELS

CURVED BUGLE

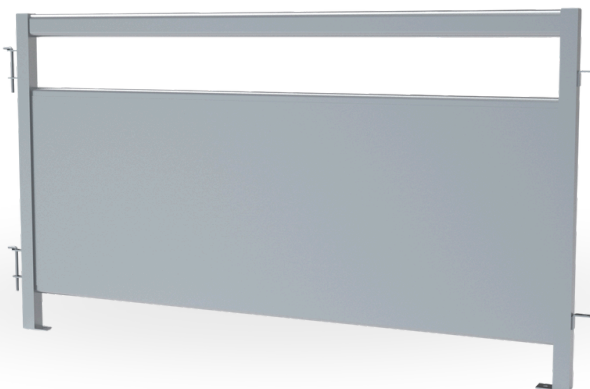

Key Features

- 1100 mm high
- Fully galvanised and sheeted frame
- Welded caps and feet
- Ensures smooth stock flow
- Curved shape

Due to its curved design, this feature offers smooth flow of sheep into drenching/ drafting races.

2 METRE SHEETED PANELS

Key Features

- 2000 mm x 1100 mm high
- Fully galvanised and sheeted frame

Works effectively when placed opposite a curved bugle panel, encouraging sheep to enter the drench/draft race.

Key features

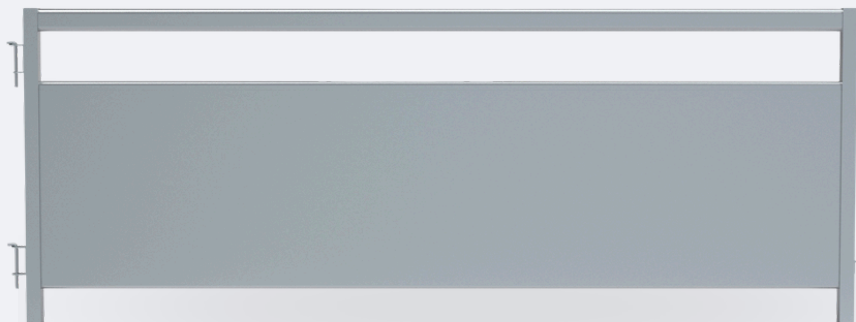

- 3000 mm x 1100 mm high
- Fully galvanised and sheeted frame

These panels are highly effective when focused on bugling down your sheep towards the drench/draft race.

Quality guaranteed

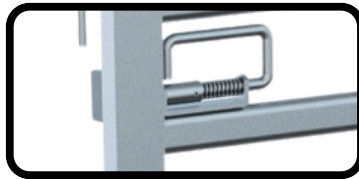

3 METRE SHEETED PANELS

SHEEP GATES

SLAM GATE

Key features

- 2200 mm high frame x 1100 mm high gate inner
 - Fully galvanised 50 mm x 50 mm frame
 - 6 oval rail anti-bruise rails
 - Heavy top rail 80 mm x 40 mm
 - Lower rails 60 mm x 30 mm
 - Welded caps and feet
 - Slam latch
- Available Widths: 2400 mm and 1500 mm**

Key features

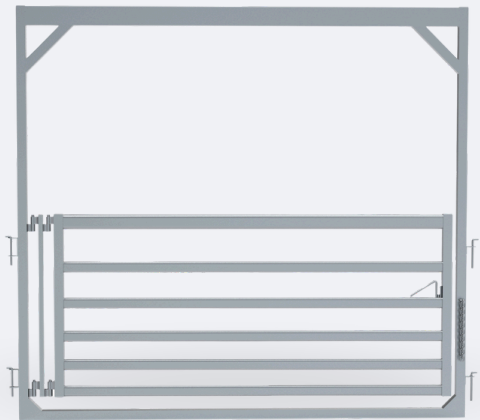

- 2200 mm high frame x 1100 mm high gate inner
- Fully galvanised 50 mm x 50 mm frame
- 6 oval rail anti-bruise rails
- Heavy top rail 80 mm x 40 mm
- Lower rails 60 mm x 30 mm
- Welded caps and feet
- 360 degree swing
- Chain latch

Available Widths: 2400 mm and 1500 mm

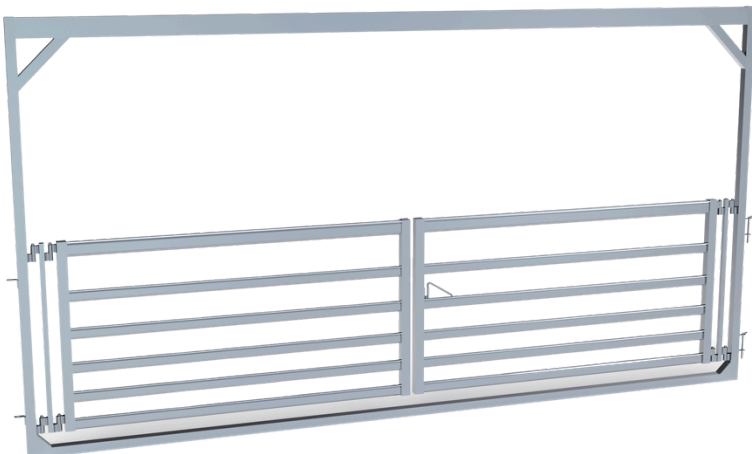

Quality guaranteed

DOUBLE HINGE GATE

4 METRE DOUBLE GATE

Key features

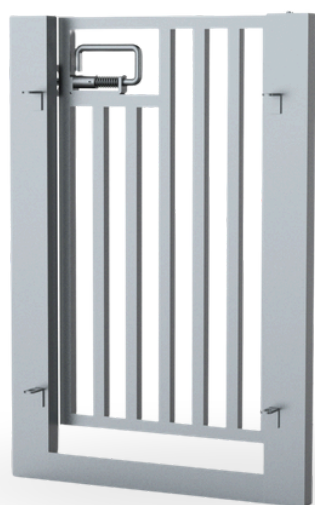

- 4150 mm x 2200 mm high
- Fully galvanised 50 mm x 50 mm frame
- 100 mm x 50 mm cap rail
- 6 oval rail anti-bruise rails
- Heavy top rail 80 mm x 40 mm
- Lower rails 60 mm x 30 mm
- Welded caps and feet
- Chain latch

Red River's sheep gates are available with either a standard chain latch or an optional slam latch for quicker operation. Each gate is built with a heavy-duty galvanised frame, designed for durability and ease of use. Gates are fully compatible with our panel systems and can be securely pinned in place for a stable, reliable fit.

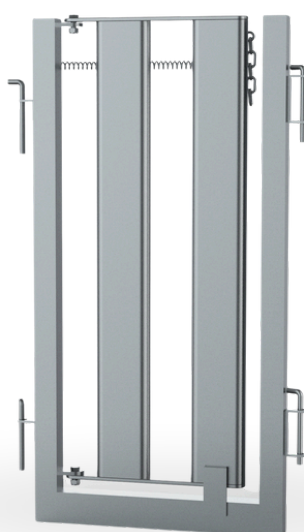

RACE GATE

Key features

- 7 vertical 30 mm x 30 mm rails
- 1100 mm high
- Fully galvanised
- Slam latch
- Welded caps

STEP THRU GATE

Spring loaded latch

Key features

- One Directional Gate
- Self closing

TUMBLE GATE

Key features

- Cut into any race even with sheep inside
- Unique design allows for the gate to fold out of the way when in the open position

GUILLOTINE GATE

WITH CABLE PULLEY AND COUNTER WEIGHT

Designed for seamless and dependable operation, our Guillotine Gate allows an operator to manage a drenching race from any location. This feature promotes single-person operation, enhancing efficiency and saving valuable time! Working in combination with the cable posts, cable pulley, and counter weight we can customize this feature into any leangth of drenching race.

Guillontine Gate

Fully galvanised 50 mm x 50 mm frame
7 vertical 30 mm x 30 mm rails
Overhead cable operation

Cable pulley and counter weight

Fully galvanised 50 mm x 50 mm frame
Plastic coated 6 mm steel cable
Stainless steel fittings and pulley system

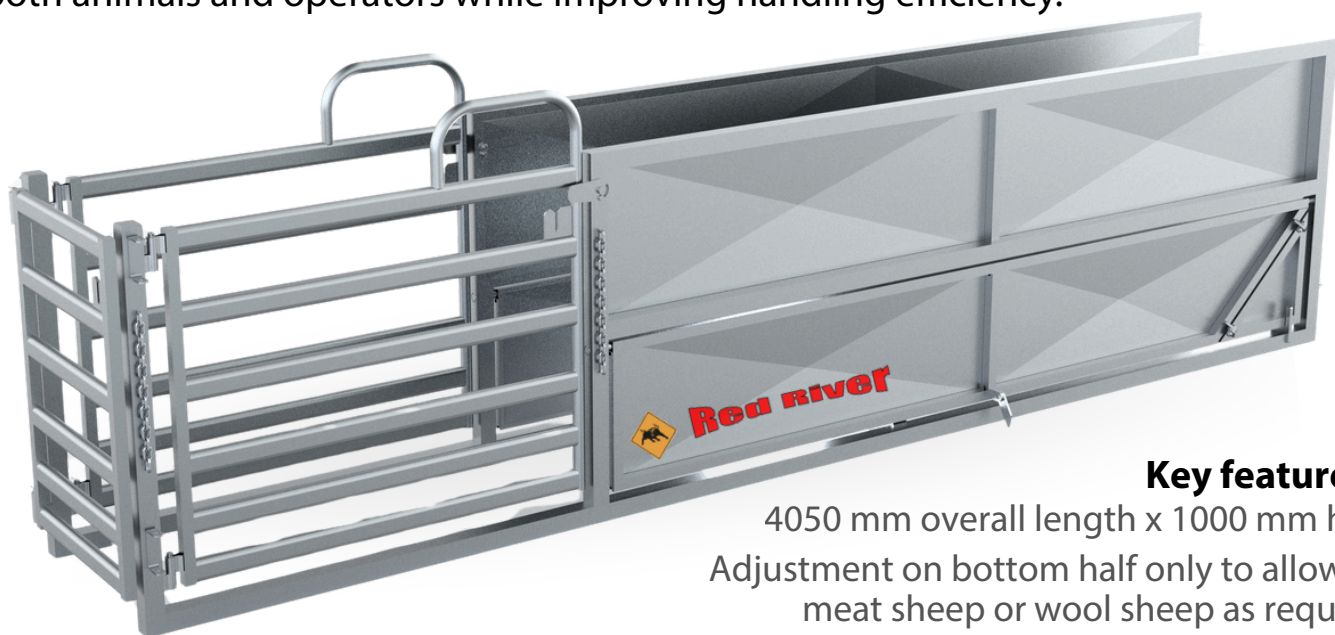

RACE OPTIONS

ADJUSTABLE VEE RACE

Red River's adjustable vee-race is designed to make drafting easier and more efficient. The race and draft system promotes smooth, fast livestock flow, helping to reduce stress on both animals and operators while improving handling efficiency.

Key features

- 4050 mm overall length x 1000 mm high
- Adjustment on bottom half only to allow for meat sheep or wool sheep as required
- Easy width adjustment
- Fully sheeted
- Fully galvanised
- Sheeted vee race section (2800 mm length)
- 1250 mm draft gates
- Draft gates 6 x 60 mm x 30 mm rails
- Swing race gate at exit

DRAFT BOX

Key features

- 1300 mm long x 1000 high
- 60 mm x 30 mm rails
- Fully galvanised
- Flip over latch
- 50 mm x 50 mm frame
- The draft box works well at the end of a drenching race or after a sheep handler, with the ability to fit into any race option.

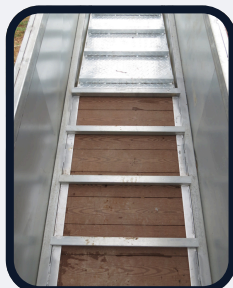

LOADING RAMP

SUITABLE FOR SHEEP OR CATTLE

STOCKMAN

Key features

Sheeted sides

Fully welded, galvanised RHS frame

Hot dipped galvanised steel floor (height adjustable section)

Anti-rot WPC composite floor (fixed section)

3000mm overall length

Height adjustable (manual)

Adjustable from a box trailer to a semi-trailer

300mm wide **R** or **L** hand side walkway - **optional extra**

ON FARM DELIVERY AND INSTALL

We offer reliable, Australia-wide delivery direct to your farm for all your cattle, sheep and horse yard needs. With our own fleet of delivery trucks, Red River Stockyards ensures prompt and secure transport of your yard systems and equipment - straight from our facility to your property. You can count on us for efficient service, no matter where you're located.

BEFORE

AFTER

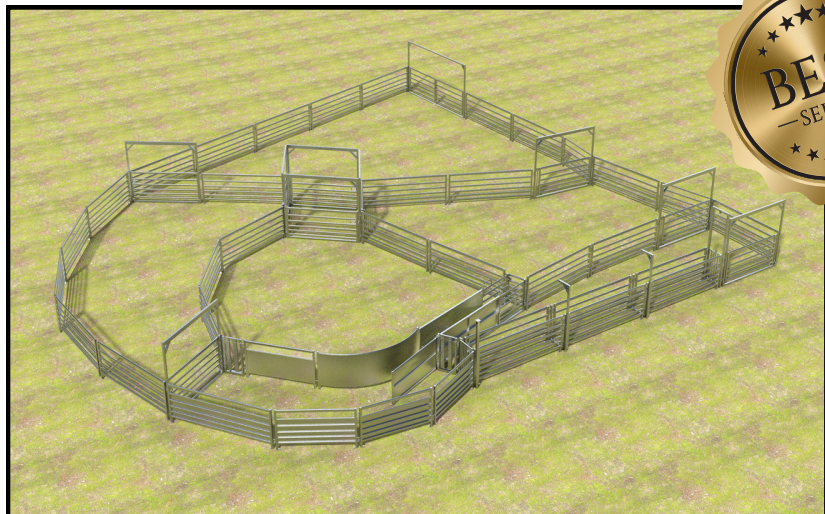

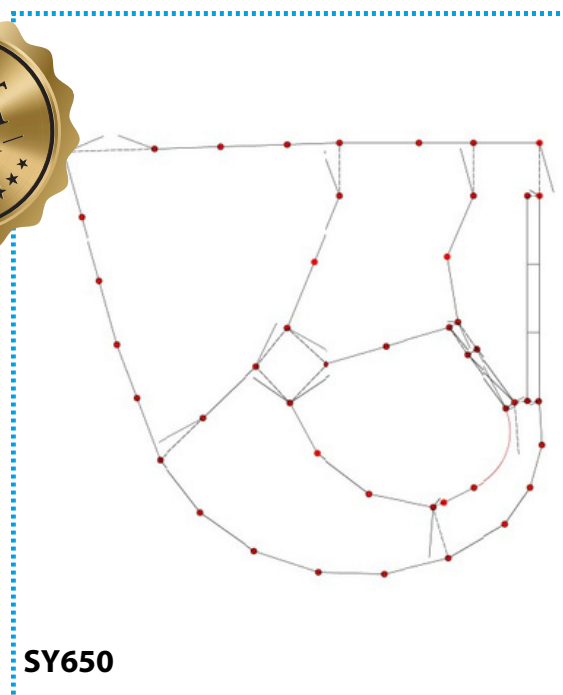

TRIED & TESTED YARD DESIGNS

Interpreting the designs

Computer generated 3D rendered drawings are a great way to get a 'feel' for how a yard will look and flow operationally. While you're still deciding on the ideal design, line drawings are often easier to interpret and make it simpler to compare the features of different yard layouts.

Key

SY650

Each yard design shows an estimation of its **holding capacity** as well as which elements are included. Designs can always be adjusted to suit your needs and orientation of your land.

Our designs are proven to have great flow, functionality and can grow with your herd. The addition of extra panels and gates allows you to incorporate more holding pens to increase flow and working capacity.

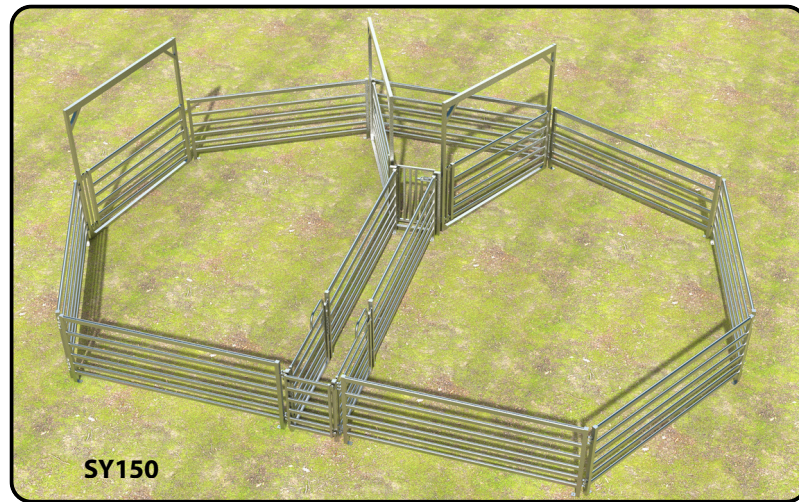

TALK TO US ABOUT A CUSTOM YARD

If you're running a very large mob, need a complete station set up, or manage mixed herds of sheep, cattle or horses, let us work with you to create your perfect solution.

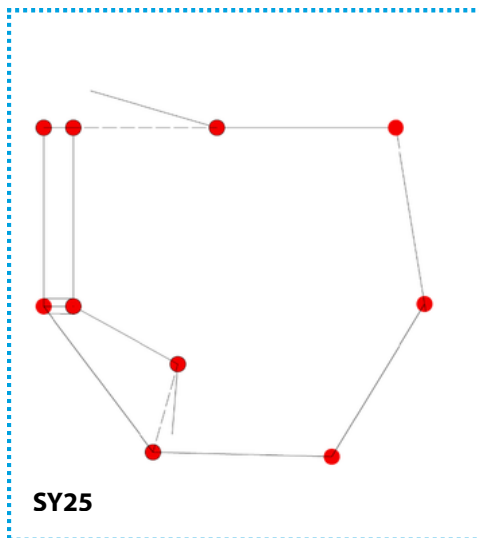

25 - 650 HEAD YARDS

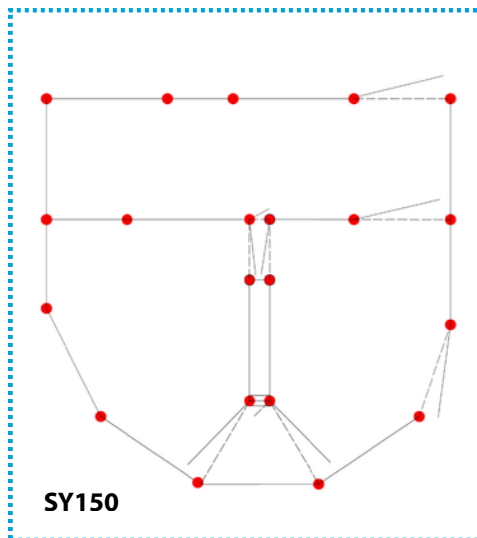

SY150

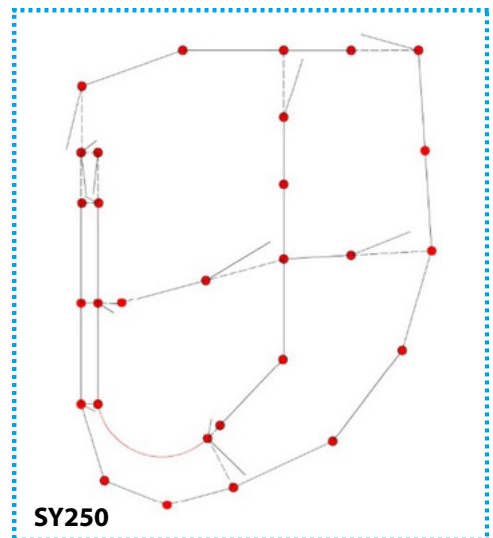

The SY90 Sheep Yard is a practical setup ideal for smaller operations or those looking for a basic handling solution. Designed for straightforward functionality, it offers efficient sheep flow and reliable performance without the complexity of advanced features.

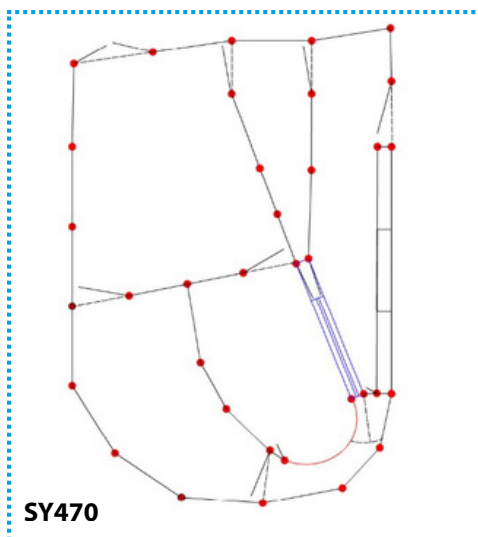

SY25

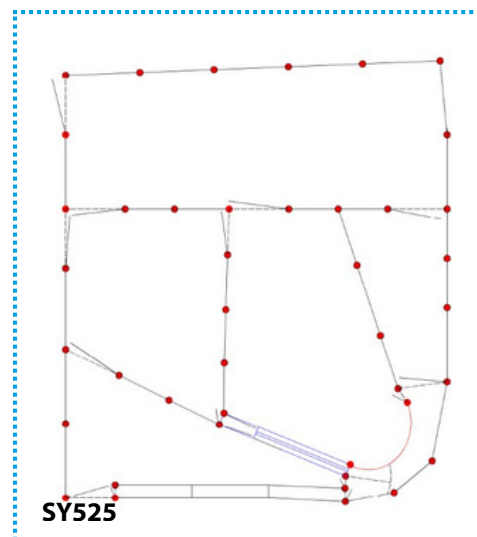

SY150

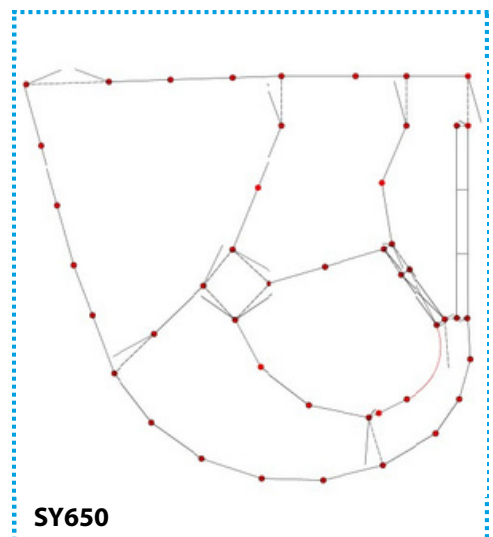

SY250

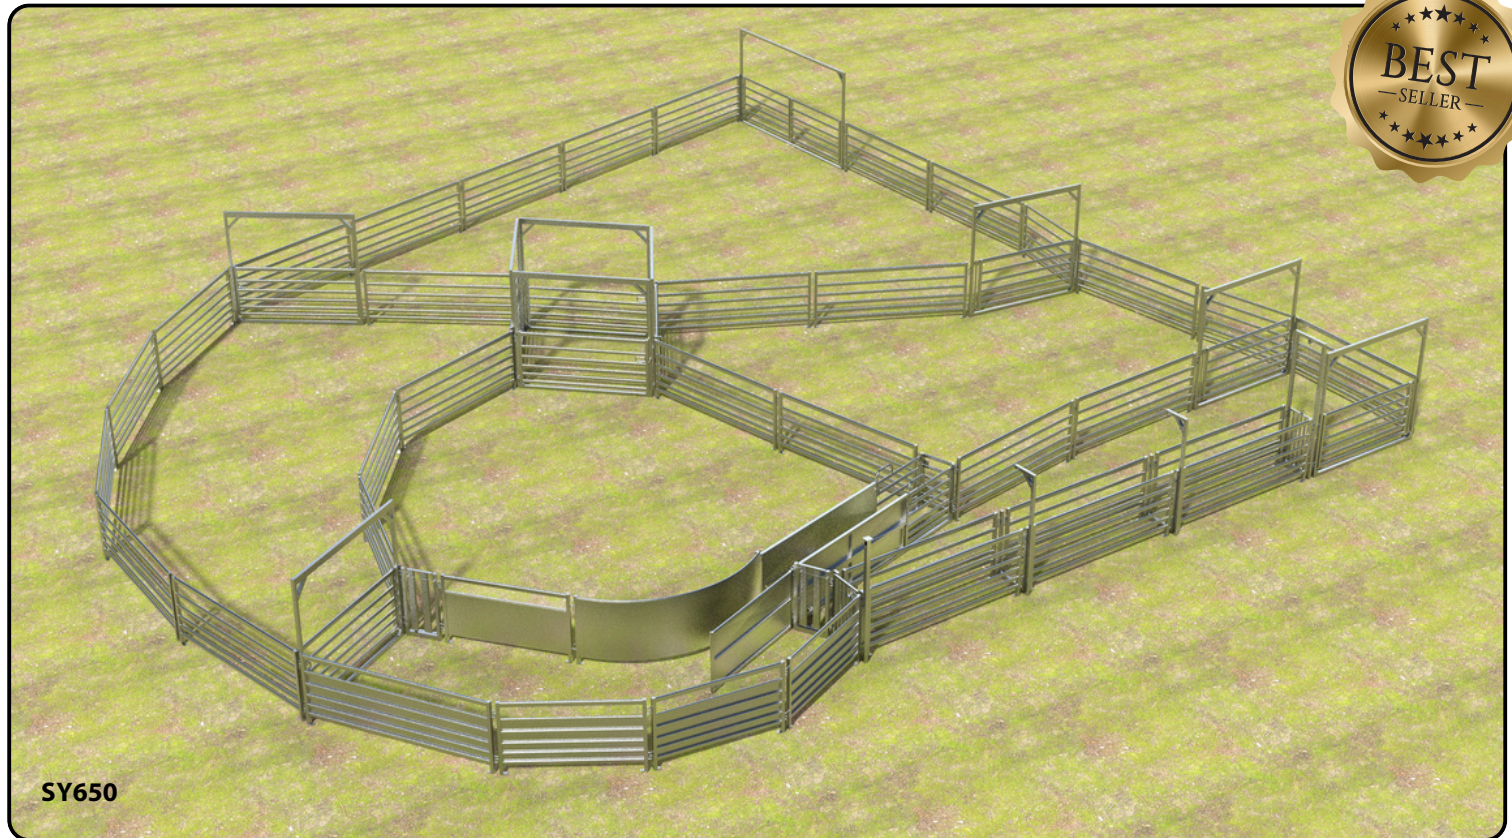

SY470

SY525

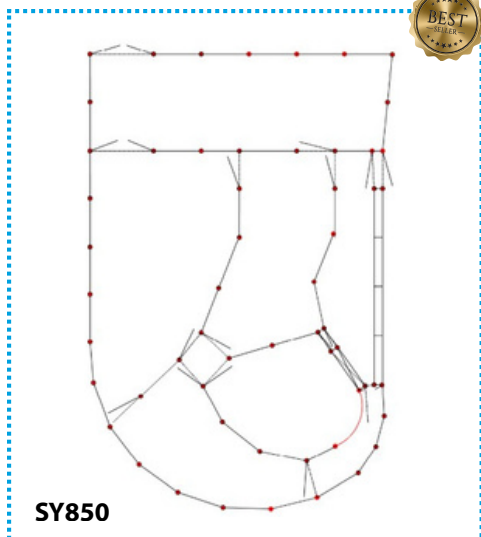

SY650

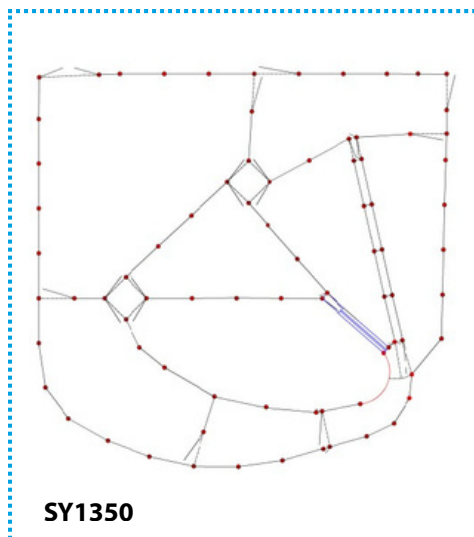

SY650

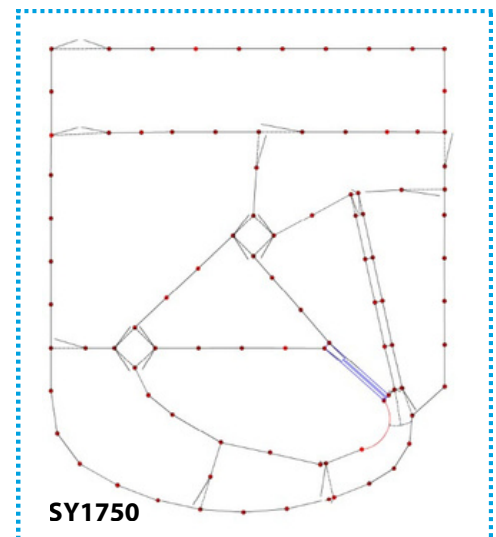

The SY650 Sheep Yard is one of our most popular and versatile setups, designed with future expansion in mind. It includes our signature curved bugle, adjustable vee race, guillotine gate, and cable pull system - allowing for efficient operation and seamless stock movement throughout the yard.

SY850

SY1350

SY1750

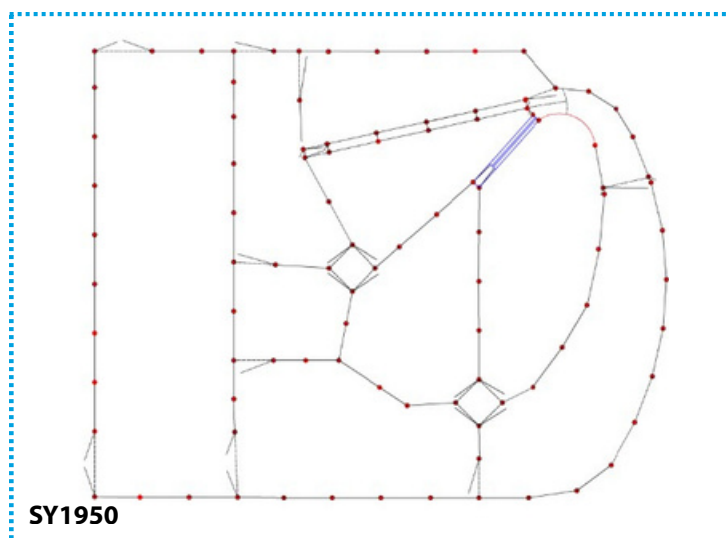

1900 - 2500 HEAD YARDS

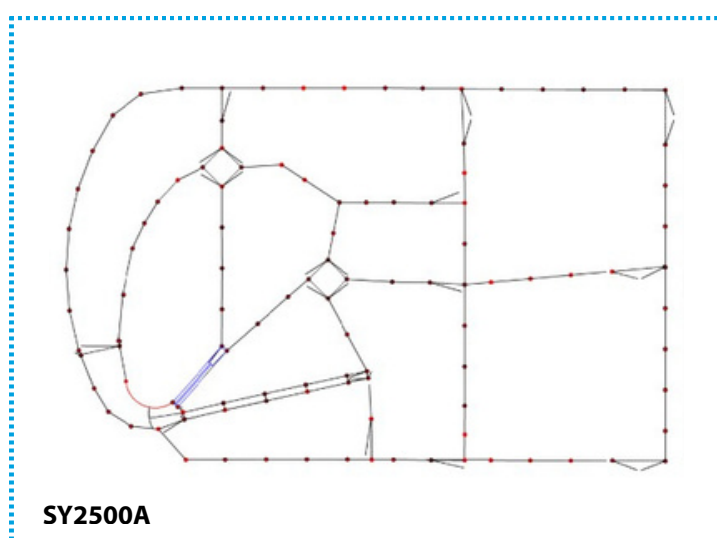

SY2500A

The SY2500 Sheep Yard is a large-scale system designed for high-throughput operations, making it ideal for serious sheep producers. It features our curved bugle, adjustable vee race, guillotine gate, and cable pull system - allowing for smooth, controlled flow and efficient handling across the entire yard.

SY1950

SY2500A

Plan your next yard

1 square : 1 panel

Ready to make it happen?

First, settle on a design

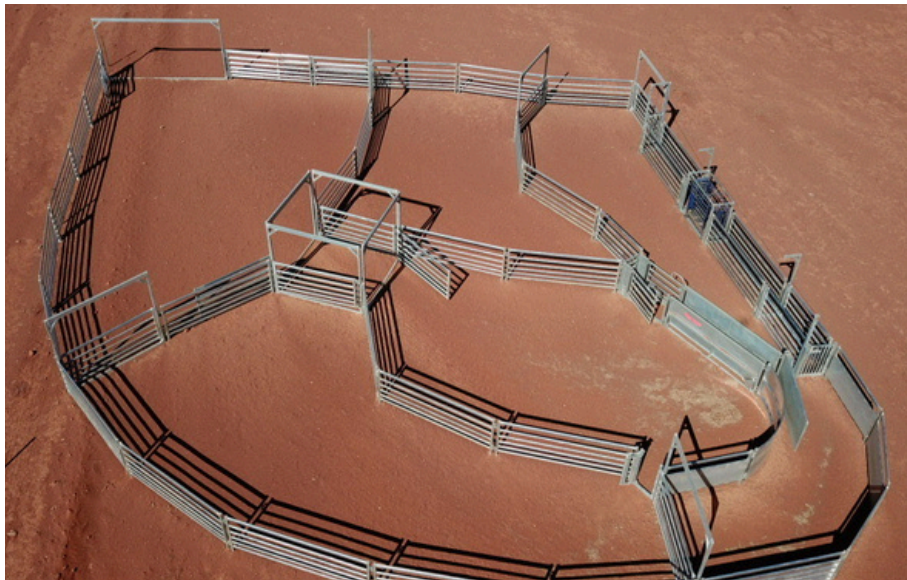

Our yard designs are named after their approximate **holding capacity**. The optimum **working capacity** is usually less. Our best selling SY650 for example, has a holding capacity of **650** sheep.

Your easiest option is to select one of our tried and tested yard designs, targeted to your head count. You'll find a range of our most popular designs from page 12.

Can't find exactly what you were hoping for?

Why not use the design pages on **pages 12 - 15**. Make a note of which of our features you liked, what extra functionality you'd prefer or try your hand at drawing your ideal set up.

Then give one of our sales team a call. They would be happy to work with you on a custom design, generating CAD drawings and 3-D rendering to bring your design to life.

Finally, getting a quote is easy

Give us a call to request a free, no obligation quote, or request one via our website. Our sales team would also be pleased to walk you through our yard exhibit at Head Office before talking you through a quote in person.

How can I purchase from Red River?

Individual components and/or complete yards can be purchased directly through our Head Office in [Tamworth](#), our [Shepparton](#) branch, or one of our [authorised dealers](#). Otherwise, reach out on [1300 068 067](tel:1300068067) or sales@redriverrural.com.au

I'm not sure exactly what will work best for our property. Can you help?

Absolutely! Our team are experienced in all aspects of cattle management and would be honoured to provide you with advice on a yard layout suitable to your individual budget, operational needs and farm environment.

Can I customise one of your designs?

Our yards are all designed to be practical and efficient and are tried & tested in a range of Australian agricultural settings. However, our unique lug design makes simple changes (e.g. extra panels, gates etc.) a breeze, and one of our sales team would be happy to work with you for more complex customisations.

Can you build my design?

Yes! Our sales team will work with you to ensure your vision comes to life. Sometimes compromises may need to be made in relation to product constraints and the proposed build environment. At times, due to unforeseen circumstances, the layout of the yard may need to be slightly adjusted during installation. The yard builder will always strive to discuss this with you beforehand.

How do I get a quote?

If you know what you want, you can request a quote directly from our [website](#) otherwise, chat to our sales team on [1300 068 067](tel:1300068067) or sales@redriverrural.com.au

Is financing available?

Yes! Contact us on [1300 068 067](tel:1300068067) or accounts@redriverrural.com.au to discuss your options.

How much deposit is required?

A deposit is not required to place an order.

When will I need to pay?

An invoice will be issued 24 hours prior to installation and must be settled prior to delivery.

So I've made a decision, now what?

Firstly, you will receive a drawing and quote of your proposed yard for review. Our team will then work with you until the price and design are exactly right. Once accepted, your order is placed and logistics will be in touch to discuss your site preparation, our access requirements, and any other delivery & installation considerations.

Are you able to deliver my yard?

Yes! We can arrange delivery to most of NSW, QLD, SA & Victoria. Delivery fees are calculated on an individual basis. One of our sales or logistic team will discuss this with you during the quoting process.

Can you set up my yard?

We sure can! Our delivery fee includes our driver to assist in the setup of your new yard on a suitable site.

Will I need a forklift or tractor?

No, our yard builders can bring one if required. However, please inform our logistics team if you *do* have access to a forklift/tractor with fork tines on your property, as sometimes this may facilitate an earlier delivery date.

How long does it take to receive my yard after ordering?

Time to delivery is dependent on a number of factors (not least the weather!), but we usually aim to have your yard with you within 4-8 weeks. When all components are ready, our logistics manager will liaise with you directly to arrange mutually convenient delivery & installation.

How long does it take to build the yard?

Depending on the size of your yard, and site access, we can have your yard set up in around 2-6 hours, and ready for immediate use.

CLIENT TESTIMONIAL

"I have bought two sets of cattle yards and one set of sheep yards through Red River so far. I chose them because they have the best quality at affordable prices. The latching system is second to none and all the yards work really well and help the cattle and sheep flow through easily."

NEW SOUTH WALES

CLIENT TESTIMONIAL

"I purchased a sheep yard from Red River Stockyards a couple of years ago, and it continues to impress with its well-thought-out design and excellent stock flow. It allows me to handle large numbers of sheep efficiently and with ease. The team at Red River delivered outstanding service, ensuring I had everything required - along with a few thoughtful extras."

Red River Stockyards represents exceptional value for money and a quality investment for any operation."
